After migrating Historian server to version 2017.x some history blocks are not able to be read

SUMMARY

After migrating to **Historian 2017.x** from an earlier version, some history blocks are not able to be read even after following [Tech Note 1019: Unable to Retrieve Data from Existing History Blocks](#).

SYMPTOMS

Some history block are not retrievable after migrating to Historian 2017.x.

ACTION

Re-Index the history blocks as follows:

1. Shutdown and disable Historian.
2. Navigate to folder DataIndex.

SMC > Configuration Editor > Storage > Storage Partitions > Main > DataIndex and delete all files/folders in it (Figure 1 below).

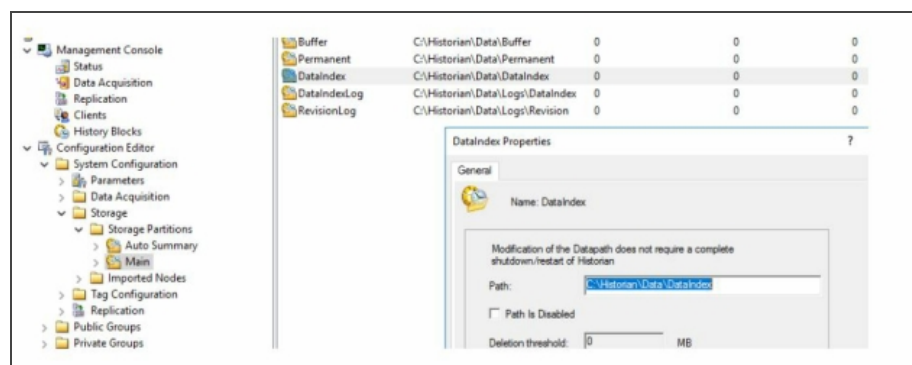

Figure 1: Navigate to DataIndex

3. Restart Historian.
